**health information nurses**

A specially trained team of registered nurses is on duty around the clock. Your nurse will ask you a few questions about your symptoms and situation, then direct you to the type of care that should make you more comfortable.

- If your condition doesn’t require immediate care, your nurse will recommend steps you can take to be more comfortable until you see your doctor.
- If you’re away from home, your nurse can help you locate nearby doctors, facilities and pharmacies.
- If you need urgent care, your nurse will direct you to the nearest qualified provider or facility.
- If it appears that you need emergency care, your nurse will direct you to call 911 or other emergency services in your area. Your nurse will help you access the appropriate services.
- If you’re directed to seek immediate medical attention, we’ll provide your doctor with the details. This information becomes part of your medical records, to update your health status and alert your doctor to the need for follow-up care if necessary.
